

 **MYMTB**

Monitoring platform for your MTB equipment

MyMTB is an intelligent platform on which all your MTB equipment is connected. All machines from your entire system are constantly monitored and analyzed thanks to a powerful sensor system.

The MyMTB application processes all the data received in real time, and allows you to improve your use of MTB machines in order to obtain a better efficiency.

Through performance indicators, you will be able to analyze your production trends to optimize your installation but also anticipate maintenance needs.

All data is protected and stored in a secure area. You will be able to access it by authenticating yourself on the application, no matter where you are.

A user-friendly platform

- Quick navigation between recycling facilities
- Global view of all the equipment present on the site
- Generation of performance indicators

Production overview

Operations analysis
Energy consumption tracking
Downtime tracking and reduction

Support center

On-line trouble shooting
Technical support request
Request follow up & history

Equipment Inventory

Processing lines or equipment overview

Documentation library

Operators Manual
Electrical Drawings
Customer documentation

Data history access

Machine Status
Machine fault
Associated reports & alerts

Notifications Center

Mail alert (on request)

An all-in-one tool

Process overview

- All machines on a single page
- Real time data
- Heat, motor load, level, speed, warnings, ...

Data analysis

- Data analysis per day, week or month
- Each area is analyzed (Shredding, Granulation, Separation)

Dashboard

- Quick overview of main indicators
- Production times over each process phase

Machine data available in real time

Technical data

Real-time overview of the different data of the machine in production such as rotor speed, temperature, power consumption, load, etc...

Data analysis

Synthetic analysis of production over long periods to provide a trend on machine efficiency.

Data storage

The data is stored on a secure server for 1 year. This parameter is adjustable according to the subscription.

Designed for mobility

With MyMTB, all the information you need is always at your fingertips. From operational and process data to critical alarms, access all the data you need from your mobile phone or tablet.

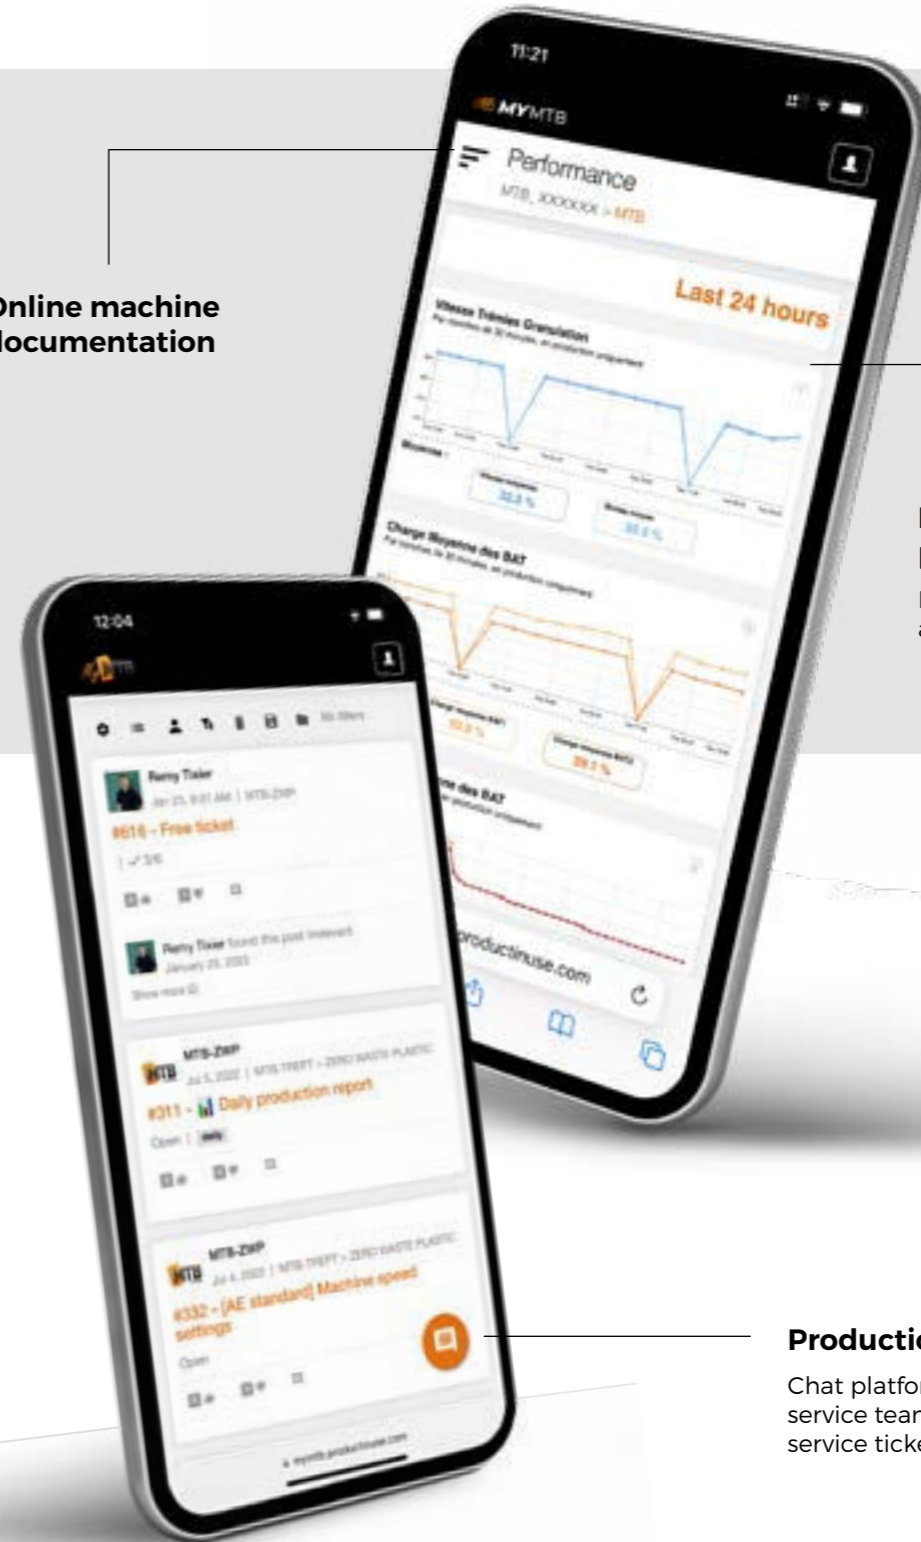

Online machine documentation

Production overview and performance

Real time and day, week and month analysis

Production support

Chat platform with MTB customer service team and creation of after-sales service tickets.

Providing high-performance recycling solutions and effective tools to enhance your user experience.
